## DETAILED ACTION

### *Election/Restriction*

1. This application is a 371 of PCT/JP04/04455. For applications filed under 371, PCT rules for lack of unity apply.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I. Claims 1-4, drawn to a protein of amino acid sequence set forth in SEQ ID NO:1.

Group II. Claims 1-4, drawn to a protein of amino acid sequence set forth in SEQ ID NO:2.

Group III. Claims 1-4, drawn to a protein of amino acid sequence set forth in SEQ ID NO:3.

Group IV. Claims 1-4, drawn to a protein of amino acid sequence set forth in SEQ ID NO:4.

Group V. Claims 5-6, drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:1.

Group VI. Claims 5-6, drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:2.

Group VII. Claims 5-6, drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:3.

Group VIII. Claims 5-6, drawn to a nucleic acid encoding a protein of amino acid sequence set forth in SEQ ID NO:4.

Group IX. Claims 7-10, drawn to a method of measuring an activity for promoting ceramide release.

Group X. Claims 11-15, drawn to a method of measuring the activity for promoting ceramide intermembrane transfer.

NOTE: Claim 15 is improperly dependent on claim 10. Proper correction is requested in response to this action.

The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2 they lack the same or corresponding special technical feature for the following reasons:

The PCT rules define a special technical feature as a feature, which defines a contribution over the prior art. The first claimed invention fails to recite such a feature, since WO 00/50607 discloses a protein and DNA encoding a protein as set forth in Group I (see claims, pages 19-20 and Examples). The protein of the reference meets the limitations of the protein of Group I.

Since the first claimed invention lacks a special technical feature, the other claimed inventions cannot share a special technical feature with the first claimed invention. The inventions of Groups I-IV are patentably distinct from the products of Groups V-VIII because

the products of Groups I-IV can be synthesized by materially different methods, such as by chemical synthesis or isolated from nature. The inventions of Groups I-IV are patentably distinct from the products of Groups V-VIII because the products of Groups I-IV can be used in methods that are materially different from the methods in which the inventions of Groups V-VIII are used, such as in purification of antibodies to in production of antibodies to the specific antigen. The methods of Groups IX-X are patentably distinct from each other because each recites method steps not required by the other, each method uses different starting materials and the search of both methods in one patent application would result in an undue search burden.

2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

**Rejoinder under *In re Ochiai*, *In re Brouwer***

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim

will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier.

Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
